

WARNING: DANGEROUS ITEM

What is it?

Asbestos is the generic term for a number of fibrous silicate minerals.

Products made from asbestos cement - a bonded asbestos material - include fibro sheeting (flat and profiled), guttering and downpipes, as well as other pipes for water, drainage or flues, corrugated roofing sheets, roofing shingles and guttering.

What to do if you find some

1. **DO NOT TOUCH IT**

Inhaling this fibre can cause serious health problems and should not be handled

2. Mark the area with sticks and brightly coloured tape
3. Alert the clean up coordinator immediately
