

# WARNING: DANGEROUS ITEM

## WHAT IS IT?

Asbestos is the generic term for a number of fibrous silicate minerals.

Products made from asbestos cement - a bonded asbestos material - include fibro sheeting (flat and profiled), guttering and downpipes, as well as other pipes for water, drainage or flues, corrugated roofing sheets, roofing shingles and guttering.

## WHAT TO DO IF YOU FIND ONE

### 1. **DO NOT TOUCH IT.**

Inhaling this fibre can cause serious health problems and should not be handled

### 2. Mark the area with sticks and brightly coloured tape

### 3. Alert the clean-up coordinator immediately
